MARIANA PEREIRA

HI!

My name is Mariana and I am a Portuguese architect.

I was born on the first of December in Lisbon but I lived with my parents in Tomar until I went to college.

I studied architecture and the faculty of architecture of the university of Lisbon, where in December of 2017 I finished my master's degree.

I am living in Stockholm since April 2018. I moved here because I love the Swedish culture and cities.

I am a very determined, creative and hard-working person. I love learning new things and having new challenges. I consider myself a very social person. During my college years I worked with children which gave me a great sense of responsibility. Meeting deadlines and having to go the extra mile to do so does not scare me.

I speak fluently Portuguese and English, I also speak Spanish and I know a little French. Currently I am learning Swedish.

In my free time I love to read, visit new places, meet with friends and see some museums. I also like to watch a good film, going to the cinema and listening to music.

## WORK EXPERIENCE

# PALACE OF THE ROSE - CHARM HOTEL

A detailed architectural rendering of a hotel courtyard. The central building is a three-story structure with a light beige facade and numerous rectangular windows with dark frames. The ground floor features a series of arched doorways. To the left, a blue-tiled building with vertical window slits is visible. To the right, a blue-tiled building with a balcony and a person on it is shown. The courtyard floor is light-colored, and several people are walking around, giving a sense of scale. The sky is a clear, bright blue.

Year: September 2016/December 2017;  
Software: Autocad, SketchUp, V-Ray och Photoshop
